

FOOD MACHINERY GREASE

General Description

Food Machinery Grease is a premium quality grease for use in food processing establishments where USDA H-1 lubricants are required due to possible incidental contact with food products.

Food Machinery Grease is a top quality aluminum complex thickened grease containing entirely food grade ingredients so as to be acceptable for this critical environment. This formulation provides excellent high temperature performance, with a dropping point over 475°F and superior oxidation stability. Food Machinery Grease provides excellent extreme pressure (EP) and antiwear protection, as well as superior rust and corrosion inhibiting properties, and water washout/spray-off performance.

Expect Excellent Performance in:

- Extreme pressure conditions
- High shock load environments
- High humidity conditions
- Chassis lubrication
- Wheel bearings
- General greasing

Features and Benefits

USDA : USDA H-1, for incidental contact in the food packaging and processing industries.

E.P. Protection: Superior EP and antiwear protection provides long machinery life and reduced maintenance.

High Temperature Protection: Excellent drop point and oxidation resistance provide long lubricant life and stability at high temperatures.

Typical Application

Food Machinery Grease is recommended for food processing and packaging equipment when a USDA H-1 lubricant is required.

Typical Customer

- Food Processing Plants
- Food Growers requiring H-1 lubricants in their equipment

FOOD MACHINERY GREASE

Typical Properties

NLGI Grade	2	1
Soap Type	Aluminum Complex	Aluminum Complex
Color	White	White
Texture	Buttery	Buttery
Dropping Point, °F	475 Min.	475 Min.
Worked Penetration	280	325
<u>Mineral Oil & Soluble Additives:</u>		
Viscosity @ 40°C, cSt	68	68
Timken OK Load, lb., min.	40	40

The typical properties listed reflect the general characteristics of the product, and are not manufacturing specifications. Normal batch-to-batch variations should be expected.

Health & Safety

A complete material safety data sheet is available upon request. Avoid prolonged or repeated skin contact. Wash clothing and exposed areas with soap and water. Don't pollute.
